

FLANDERS VACCINE

A Catalyst
for Public-Private
Partnerships
in Vaccine related
Research and Business

www.flandersvaccine.be

About us

Flanders vaccine is a non-profit, strategy-driven platform for academic and industrial stakeholders with relevant expertise in human and animal immunotherapeutics and vaccines.

Flanders vaccine brings together universities, university hospitals, research centres, SMEs, pharma, competence providers, patient organizations, and government bodies to develop novel immunological health solutions and the vaccines of the future.

Mission statement

The mission of Flanders vaccine is to stimulate innovation in vaccine related research & business and to catalyze partnerships.

Flanders vaccine aims to build a strong community...

... to bring together all stake holders in vaccine/infectious diseases/immunology related R&D

... to identify bottlenecks in vaccine/infectious diseases/immunology related R&D

... to stimulate knowledge exchange through creation of networking opportunities

... to facilitate application for funding

... to participate in EU calls for project proposals

... to catalyze (inter)national collaborations

Aims & Objectives

KNOWLEDGE | EXPERTISE | SERVICES

- All-in-one information & communication tool
- Who is who in the field
- Trends & developments
- R&D projects

COLLABORATION

- Creating joined value in a dynamic ecosystem
- National and international calls for project proposals
- Identification of R&D themes in the field

COMMUNICATION

- Visibility and exposure of our cluster within Europe
- Access to platform organizations in other countries
- Impact on vaccine/infectious diseases/immunology related policy

Boost innovation by joining forces!
