Symposium on Ethical Aspects in Early Clinical Development

December 7, 2018

Brussels, Belgium

Pullman Brussels Centre Midi

Ethical Aspects in Early Clinical Development

The Belgian Association of Phase I Units (BAPU) has great pleasure in inviting you to its 8th symposium on early clinical drug development. BAPU was founded in January 2005 and represents the Belgian phase I clinical research units located both in pharmaceutical industry and in academia. One of the primary objectives is to facilitate communication and collaborations between Belgian phase I units on the one hand and professional national and international organizations as well as official authorities.

Since the first BAPU symposium in 2006, a European platform has been created with partner organizations in Germany (AGAH), France (Club Phase I) and the United Kingdom (AHPPI) with whom joint European meetings are organized. As a result of this continued collaboration, in 2015 the European Federation for Exploratory Medicines Development or EUFEMED was founded. By joining forces, we collectively wish to promote clinical drug development at a European level with the ultimate goal of improving patient care.

Friday, December 7, 2018
